hydrocyanic acid. Said shift of equilibrium results in the fact that the characteristic compound VII of the obtained reaction mixture can be found in a proportion of 20-30%.

Therefore, the present invention is novel and nonobvious.

Please charge any shortage in fees due in connection with the filing of this paper, including Extension of Time fees to Deposit Account No. 11.0345. Please credit any excess fees to such deposit account.

Respectfully submitted,
